About

I'm a Web developer based in Kottayam, Kerala, curious to learn more about developing scalable distributed systems, love problem-solving, and care about writing readable as well as maintainable code.

Skills

Proficient With:	Angular.js, Codeigniter, Laravel, PHP, HTML, CSS
Familiar With:	MySQL, Slim Framework, NotORM, jQuery, Bootstrap, REST APIs, FileZilla server maintenance, GitHub Actions

Work / Project Experience

Current	**Software Engineer**, *Yatnam Technologies*, **Aug 2022- Present**
Project	**E-commerce Application**
Role	Laravel Developer
Technologies	Laravel, MySQL, JavaScript, HTML, CSS, PayPal API, Git
Description	○ Designed and developed a full-featured e-commerce platform with product and category management.
	○ Integrated PayPal API for a secure and reliable payment system.
	○ Utilized Laravel's Eloquent ORM for efficient data manipulation.
	○ Implemented user authentication, profile management, and role-based permissions.

Project	**Human Resource Management System (Learning Project)**
Technologies	Laravel, MySQL, Bootstrap 4, jQuery, RESTful APIs, Git
Description	○ Developed a scalable HRMS using the Laravel framework, with modular MVC architecture.
	○ Created dynamic modules for employee management, attendance tracking, and leave management.
	○ Integrated RESTful APIs to facilitate data exchange, ensuring seamless interactions and faster page loads.
	○ Optimized query performance in MySQL, reducing query time by 30%.
	○ Deployed the application using Git version control and managed server-side operations.

Project	**Medical Supply Management System**
Technologies	Bootstrap, jQuery, Codeigniter, MySQL, Bitbucket, Jira
Description	○ Developed role-based authentication and authorization for different user roles (super admin, doctor, pharmacist).
	○ Implemented order management, tracking, and notification systems for medicine orders.

Web Developer, *KingsLabs Technologies*, **Jan 2021- Jul 2022**

Project	**Todo CRM Related Works**
Technologies	Angular.js, Bootstrap, jQuery, PHP, Slim Framework, NotORM, REST API, MySQL, FileZilla, GitHub Actions
Description	○ Implemented Google Sign-in authentication and personal data fetch.
	○ Automated mail generation and created calendar event notifications through Gmail App.
	○ Integrated Facebook LeadAds to generate leads and visualize data using HighCharts.

Project	**Calorie Counter App (College Project)**
Technologies	Java, SQLite, Firebase MLKit, Third-party Camera API, TensorFlow Lite
Description	○ Developed an open-source project for identifying calories in food using Firebase MLKit with both online and offline modes.
	○ Achieved good accuracy in offline mode using trained food images.

Education

May 2020	**MCA - Master of Computer Applications**, *Saintgits College of Engineering, Kottayam*, Kerala, India Overall score: 7.32 CGPA
March 2018	**BCA - Bachelor of Computer Applications**, *SB College, Changanacherry*, Kottayam, Kerala Overall score: 7.18 CGPA
2013–2015	**Higher Secondary**, *St Berchmans School, Changanacherry*, Kerala, India Kerala State Board, 79% marks
2012–2013	**High School**, *St Berchmans School, Changanacherry*, Kerala, India Kerala State Board, 76% marks

Strengths

Problem-solving, Thinking outside the box, Team-player
